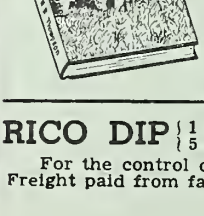
THE PASTURE BOOK and THE LIVESTOCK BOOK



These valuable books were written by W. R. Thompson, Extension Pasture Specialist, State College, Miss. He is a real authority on building good pastures and on livestock. Mr. Thompson is in much demand as a speaker before agricultural groups. His books give much useful information and pictures. The Pasture Book has been so popular that there have been 10 editions since 1949. The Livestock Book came out recently. Every farmer should have these books. **Order from us today. Each book costs $3.50.**

COASTAL BERMUDA GRASS (CERTIFIED)

This grass is extra popular for grazing and hay. Ask for our sheet giving general information and planting and fertilizing recommendations. Feb. 15 to April 15 is generally regarded as the best and safest time to set out stolons or sprigs of Coastal Bermuda. We are digging now—when the ground is dry enough. Use 5,000 to 7,000 per acre. We bale our stolons like bales of hay, about 75 lbs each. The quantity per bale varies but the average is about 6,000. Packing bales smaller this year than last. Bales have metal straps around all sides. Bales submerged in water soon as dug. **Read our information sheet. Make arrangements with us before sending trucks.** Prices per 1,000 stolons f.o.b. here are:

OUR SEED LABORATORY

We have had a Seed Laboratory for years to check and test the seed we buy and sell. This is for your protection and ours, and we know you appreciate the great value of this. Our analyst, Earl Lott, is a Senior Member of the Society of Commercial Seed Technologists. His tests are acceptable to PMA in all states and to other agencies. There are only about 100 Senior Analysts in the U. S.

WE FURNISH TESTS FOR PMA IF WANTED. CAN USUALLY FURNISH THEM IMMEDIATELY.

We do commercial testing also. May we do some for you? You will like our accuracy, promptness and reasonable rates. Show lot numbers on your representative samples. Mark them for "Seed Laboratory". We shall make complete tests unless you specify only purity or only germination.

FLY FLAKES

SIMPLEST FLY-KILLER IN HISTORY

We have tried this new Fly Killer out ourselves and know it works wonderfully. One outstanding qualification is that it is so easy to put out—simply scatter flakes by hand, no spraying. Flies feast on FLY FLAKES and die in minutes. This poison is long-lasting—kills for days. Kills flies resistant to DDT. Also kills maggots—in poultry houses, stables, etc. We have never tried any fly poison as simple to use, effective and economical. Not dangerous to warm-blooded animals. You are urged to place trial orders at once. We think it is a "must" for farmers and dairymen around barns, etc., for poultrymen, etc. Ask for literature.
